

RANGER 3D

Ranger Inspection™ is committed to providing industry best 3-Dimensional Laser Scanning Services and have invested our resources to put our division Ranger 3D on the forefront.

Ranger 3D has upgraded all aspects of our 3D division. Acquiring and utilizing the latest in 3D scanning equipment and the most comprehensive 3D modeling and analysis software available.

Our client list for completed 3D work is extensive and includes all the majors. We provide in-house analysis by our inspectors and engineers in accordance with applicable codes and standards including the American Petroleum Institute (API).

3D Laser Scanning / Imaging / Modeling and Analysis Services:

- Tanks, Vessels, Spheres, Bullets, Piping, Oil Tankers, All Equipment.
- New Construction / Existing Equipment and Facilities.
- Internal and External Settlement Measurement and Analysis.
- Bottom Plate Profile Modelling and Analysis.
- Shell Plate Profile / Deflection / Deformation / Plumbness / Out-of-round.
- Berm and Dyke Capacity, Containment, and Volume Calculations.
- Structural Analysis Modeling and Evaluation.
- Creation of Volumetric Calibration Tables.
- Column Tilt / Plumbness Survey and Analysis.
- Hydrostatic Test Monitoring.
- Tank Floating Roof Cycle Profile and Evaluation.
- Site Mapping / Modelling.
- Pipe Rack Settlement.

Featuring top-of-the-line technology from:
